Objective

Ambitious computer science graduate with a robust foundation in AWS cloud architecture and AIML development. Certified in AWS, GOOGLE, and CISCO. Proven track record in building Healthcare solutions and optimization of data pipelines. Seeking to leverage my emotional intelligence and technical expertise in AI to be a Data Analyst, Cloud Engineer or an AI MLops engineer.

Experience

- **SmartBridge x APSCHE**
 - 2025
 - AI Intern
 - Engineered high accuracy predictive models for medical data analysis, facilitating data driven decision making in clinical contexts.
 - Leveraged machine learning frameworks to interpret complex healthcare datasets and identify key diagnostic patterns.
- **AWS Academy**
 - 2024
 - Cloud Intern
 - Arcgutected and optimised scalable data pipelines utilising Amazon EC2 and S3 to streamline large scale data processing.
 - Enhanced cloud infrastructure reliability by implementing best practices in resources management and data storage.

Education

Course / Degree	School / University	Grade / Score	Year
B.Tech Computer Science	Swarnandhra College of Engineering and Technology	7.97/10	2022-2026
XII Std	N.G.R College, Nagaram, Konaseema District, Andhra Pradesh.	74%	2021
X	S G G Z P P High School, Mamidikuduru, Konaseema District, Andhra Pradesh.	75%	2019

Projects

- **AI Chatbot(In Progress)**

html, Css, javaScript, Python developing a chatbot using Python with basic Natural Language Processing (NLP) techniques. The project focuses on understanding user queries and generating simple automated responses, aiming to build an intelligent assistant.
- **IoT Gas Leakage Detector**

microcontroller (Arduino/ESP),C/C++
Built an IoT-based gas leakage detection system using sensors and a microcontroller (Arduino/ESP). The system continuously monitors gas levels and triggers alerts when unsafe levels are detected, helping to enhance safety in homes and industrial environments.
- **Maintenance and Calibration Tracking System**

Microsoft Power Platform (Power Apps, Power Automate, Power BI). Developed a maintenance and calibration tracking system using Microsoft Power Platform. Designed user interfaces with Power Apps, automated workflows and notifications using Power Automate, and managed data through SharePoint. Created dashboards in Power BI for monitoring and reporting, improving efficiency and reducing manual tracking.
